Price List 2016/17

SmartPLS GmbH, GERMANY
www.smartpls.com
Email: sales@smartpls.com

A **single user license** allows the installation of SmartPLS on a specific computer. License activation requires internet access, afterwards the license can be used offline. The license period starts from the date of first use (you can buy it now and use it later).

A **network license** allows the installation of SmartPLS on an arbitrary number of computers. But only a limited number of computers (=concurrent users) may run SmartPLS simultaneously. The license period starts from the day of license creation. If you want to buy a network license now but want to use it later, please let us know when ordering. For the operation of a network license you can use our infrastructure or maintain your own license server installation.

Prices for Single User Licenses
